

The `latex-lab-amsmath` code*

L^AT_EX Project

May 25, 2023

Abstract

Contents

1	Introduction	1
2	The Implementation	1
2.1	File declaration	1
2.2	Tagpdf support	1
2.3	<code>\intertext</code>	2
	Index	2

1 Introduction

This file implements adaptations to the `amsmath` package needed for the tagging project.

2 The Implementation

```
1 <@@=math>
2 <*=kernel>
```

2.1 File declaration

```
3 \ProvidesFile{latex-lab-amsmath.ltx}
4 [2023-01-05 v0.1a amsmath adaption]
```

2.2 Tagpdf support

To make the code independent from tagging being loaded and active we load the `tagpdf-base` package:

```
5 \RequirePackage{tagpdf-base}
6 \ExplSyntaxOn
```

*

2.3 \intertext

The `\intertext` command errors with active tagging as it is processed twice which leads to duplicated structures.

```

7 \AddToHook{package/amsmath/after}
8 {
9   \def\intertext@{%
10     \def\intertext##1{%
11       \ifvmode\else\\@empty\fi
12       \noalign{%
13         \penalty\postdisplaypenalty\vskip\belowdisplayskip
14         \vbox{

```

Stop tagging when measuring:

```

15       \ifmeasuring@\tag_stop:\fi
16       \normalbaselines
17       \ifdim\linewidth=\columnwidth
18       \else \parshape\@ne \@totalleftmargin \linewidth
19       \fi

```

End the previous mc:

```

20       \tag_mc_end_push:

```

We are already in a par so we change now to Span:

```

21       \tagpdfsetup{paratag=Span}%
22       \noindent\ignorespaces##1\par

```

Restart the MC

```

23       \tag_mc_begin_pop:n{}}}%
24       \penalty\predisplaypenalty\vskip\abovedisplayskip%
25     }%
26   }}
27 }
28 \ExplSyntaxOff
29 </kernel>

```

Index

The italic numbers denote the pages where the corresponding entry is described, numbers underlined point to the definition, all others indicate the places where it is used.

Symbols		D	
<code>\</code>	11	<code>\def</code>	9, 10
