

# Package ‘HIViz’

July 23, 2025

**Type** Package

**Title** Interactive Dashboard for 'HIV' Data Visualization

**Version** 0.1.2

**Description** An interactive 'Shiny' dashboard for visualizing and exploring key metrics related to HIV/AIDS, including prevalence, incidence, mortality, and treatment coverage. The dashboard is designed to work with a dataset containing specific columns with standardized names. These columns must be present in the input data for the app to function properly: year: Numeric year of the data (e.g. 2010, 2021); sex: Gender classification (e.g. Male, Female); age\_group: Age bracket (e.g. 15–24, 25–34); hiv\_prevalence: Estimated HIV prevalence percentage; hiv\_incidence: Number of new HIV cases per year; aids\_deaths: Total AIDS-related deaths; plhiv: Estimated number of people living with HIV; art\_coverage: Percentage receiving antiretroviral therapy (ART); testing\_coverage: HIV testing services coverage; causes: Description of likely HIV transmission cause (e.g. unprotected sex, drug use). The dataset structure must strictly follow this column naming convention for the dashboard to render correctly.

**Depends** R(>= 3.5.0)

**VignetteBuilder** knitr

**Suggests** testthat (>= 3.0.0), knitr, rmarkdown

**License** GPL-3

**Encoding** UTF-8

**LazyData** true

**Imports** shiny (>= 1.7.0), shinydashboard, readxl, haven, dplyr, DT, ggplot2, plotly, tidyverse, wordcloud, ggrepel, paletteer, shinyWidgets, tools

**RoxygenNote** 7.3.2

**URL** <https://github.com/Atefrehashidi/HIViz>

**BugReports** <https://github.com/Atefrehashidi/HIViz/issues>

**Config/testthat.edition** 3

**NeedsCompilation** no

## Contents

launchApp . . . . .	2
sample_data . . . . .	3

Index . . . . .	4
-----------------	---

---

launchApp	<i>Launch the HIViz Shiny App</i>
-----------	-----------------------------------

---

### Description

This function launches the Shiny application.

### Usage

```
launchApp()
```

### Value

Invisible NULL. Called for its side effects (launches the Shiny application in the default browser).

### Examples

```
if (interactive()) {  
  HIViz::launchApp()  
}
```

---

`sample_data`

*Sample HIV Epidemiology Dataset*

---

## Description

A small sample dataset for demonstrating the HIViz dashboard.

## Usage

```
sample_data
```

## Format

A data frame with 3 rows and 10 variables:

**country** e.g., Iran, Spain

**year** Numeric year

**sex** Gender (Male, Female)

**age\_group** Age group (e.g., "15–24")

**hiv\_prevalence** % Prevalence

**hiv\_incidence** New cases

**aids\_deaths** AIDS deaths

**plhiv** People living with HIV

**art\_coverage** % ART coverage

**testing\_coverage** % Testing coverage

**causes** Cause of transmission
