29 September 1997

1 Introduction

This document describes the *matlog* option for the SVJOUR L^AT_EX 2_ε document class. For details on manuscript handling and the review process we refer to the *Instructions for authors* in the printed journal. For style matters please consult previous issues of the journal.

2 Initializing the class

As explained in the main *Users guide* you can begin a document for *Archive for Mathematical Logic* by including

```
\documentclass[matlog]{svjour}
```

as the first line in your text. All other options are also described in the main *Users guide*.

3 Extra commands

There is only one additional command:

```
\subclass{classification}
```

It is needed to specify the *Mathematics Subject Classification*, which is printed as a footnote. This command is similar to `\author` and should appear before the `\maketitle` command.
